M014 Carrier Route Information Lines

Summary M014 describes carrier route information elements and lists descriptive prefixes (e.g., “Rural Route” (“R”)).

1.0 BASIC INFORMATION

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under M020, optional endorsement lines under M013, or carrier route information lines under 2.0. These standards apply to automation Carrier Route First-Class Mail, Carrier Route Periodicals, Enhanced Carrier Route Standard Mail, and Carrier Route Bound Printed Matter mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level.

2.0 FORMAT AND CONTENT

Route Information
2.1 Carrier route information consisting of a descriptive prefix (or its abbreviation), plus a route number or numeric code, must be on the top line of the address, either alone or with other information (e.g., addressee, account data). Alternatively, when permitted by standard, the carrier route information may appear with the applicable carrier route endorsement on the line above or two lines above the address if the carrier route rate marking is in the address area (see Exhibit 2.1).
