1.0 General Information for Mail Preparation

1.1 Basic Standards

All mailings at Parcel Select prices are subject to these general standards:

- a. Each mailing must meet the applicable standards in [401](#), [402](#), [453](#), [455](#), and [456](#).
- b. All pieces that are palletized must be prepared under [705.8.0](#).

1.2 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.3 Definition of Mailings

A mailing is a group of pieces within the same class of mail and, within the same processing category that may be sorted together and/or presented under a single minimum volume mailing.

1.4 Terms for Presort Level

Terms used for presort levels are defined as follows:

- a. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *5-digit scheme (pallets and sacks)*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in [L606](#).
- c. *ASF/NDC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or network distribution center (NDC) (see [L601](#), [L602](#), or [L605](#)).
- d. *Mixed [NDC, etc.]*: the pieces are for delivery in the service area of more than one NDC, etc.

1.5 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit scheme* sort for parcels yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#), and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for price eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. The *required at* [quantity] instruction (e.g., “required at 7 pieces”) means that the particular unit must be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Containers may contain more than the specified required at quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- e. The *optional at* [quantity] instruction means that the particular unit may be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Containers may contain more than the specified optional at quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- f. *Entry [facility] (or origin [facility])* refers to the USPS mail processing facility (e.g., “entry NDC”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer's location (e.g., for plant-verified drop shipment), the Post Office of entry determines the entry facility. Entry SCF includes both single-3-digit and multi-3-digit SCFs. Entry NDC includes subordinate ASFs unless otherwise specified.
- g. An *overflow sack* for Parcel Select DSCF mail is a 5-digit scheme or 5-digit sack prepared with fewer than seven pieces after all other sacks for that same 5-digit scheme or 5-digit ZIP Code area are prepared with seven or more pieces per sack as required by [4.2, Preparing Destination SCF \(DSCF\) Parcel Select](#). If all of the mail is sacked under [4.0](#), only one overflow sack is permitted for each 5-digit scheme or 5-digit ZIP Code. If a mailing is prepared on pallets, remaining pieces of Parcel Select mail may be prepared in one or more 5-digit scheme or 5-digit overflow sacks only after one or more 5-digit scheme or 5-digit pallets are prepared to meet the minimum pallet requirement specified in [705.8.0](#). Pieces in overflow sacks qualify for the Parcel Select DSCF prices.

- h. An overflow pallet in a Parcel Select DSCF mailing is a 5-digit scheme or 5-digit pallet containing pieces that remain after one or more 5-digit scheme or 5-digit pallets have been prepared to meet the minimum pallet requirement specified in [705.8.0](#). Only one overflow pallet per 5-digit scheme or 5-digit ZIP Code area is permitted for Parcel Select DSCF mail palletized under [705.8.0](#). Pieces on overflow pallets qualify for the DNDC rates
- i. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces.

1.6 Separation

Except for mail entered at DSCF or DDU prices (which are not zoned prices), Parcel Select pieces must be separated by zones when presented for acceptance unless either the correct postage is affixed to each piece or the mailing is prepared under [1.7](#), or the mailing is presented under a special postage payment system under [705.2.0, Manifest Mailing System](#), [705.3.0, Optional Procedure Mailing System](#), or [705.4.0, Alternate Mailing System](#). If DSCF sacks prepared under [4.2.3](#) are included in the same mailing as DSCF pallets prepared under [705.8.20.1e.](#), then at the time of acceptance the mailer must separate the sacks that are overflow from palletized mail from those sacks that were prepared under the provisions of [4.2](#).

1.7 Commingled Zones

Zoned Parcel Select pieces need not be separated by zones when presented for verification, other than as individual pieces or with full correct postage affixed to each piece, subject to this section. Nonidentical-weight pieces not bearing the full correct postage may not be commingled unless authorized by the BMS manager. The mail must be prepared and documented under either of the following:

- a. [705.2.0, Manifest Mailing System](#), or [705.4.0, Alternate Mailing System](#); or
- b. All of these conditions:
 - 1. A unique number is assigned to each sack/pallet in the mailing and printed on a separate line at the top of the sack/pallet label (above the Line 1 information).
 - 2. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to sacks/pallets in the mailing, that shows the Post Office where the mail is to be entered (entry Post Office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement(s), the name and address of the mailer, the permit number (if applicable), the date of mailing, individual line entries for each sack/pallet, and the total number of pieces to each zone and in the entire mailing or mailing segment. Line entries for sacks/pallets containing mail for only one zone must show the sack/pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the sack/pallet. Entries for sacks/pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the sack/pallet. Mailings are not accepted if there are

discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage.

1.8 Parcel Select Markings

[1-27-13] Each piece in a Parcel Select mailing must bear a price marking. Markings must appear in either the postage area described in [402.2.5.1](#), or in the address area on the line directly above or two lines above the address if the marking appears alone (when no other information appears on that line). The “Standard Post” marking is not allowed on any Parcel Select mailpiece. The following product markings are required:

- a. Destination Entry — “Parcel Select”.
- b. NDC Presort — “Parcel Select NDC Presort” or “Parcel Select NDC PRSRT”
- c. ONDC Presort — “Parcel Select ONDC Presort” or “Parcel Select ONDC PRSRT”.
- d. Nonpresort — “Parcel Select Nonpresort” or “Parcel Select NPS”.
- e. Lightweight — “Parcel Select Lightweight” or “PS Lightweight”.

2.0 Sacks

Line 3 must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

3.6 Electronic Verification System

4.0 Preparing Destination Entry Parcel Select

4.1 Preparing Destination Delivery Unit (DDU) Parcel Select

4.1.1 Definition

A destination delivery unit (DDU) is a facility that delivers to the addresses appearing on the deposited pieces in a destination entry Parcel Select mailing. Refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#) for address) to determine the location of a 5-digit delivery facility. Use [L606](#) only for mailings prepared using the optional 5-digit scheme sort.

4.1.2 Basic Standards

Pieces must meet the applicable standards in [4.0](#) and the following criteria:

- a. Must be part of a mailing of at least 50 Parcel Select pieces.
- b. Pieces must be entered by the mailer at the postal facility where the carrier delivers the parcels (delivery unit) as defined in [453.3.1.1](#).
- c. If the delivery unit serves more than one 5-digit ZIP Code, the pieces must be separated by 5-digit ZIP Code when unloaded, unless prepared as optional 5-digit scheme sacks or pallets. Refer to the Drop Shipment Product available from the National Customer Support Center (see [608.8.1](#)) to determine the location of the delivery unit, whether it serves more than one 5-digit ZIP Code, and whether it can handle pallets.

4.1.3 Sacking and Labeling

There are no minimum sacking or pallet preparation standards. DDU pieces may be bedloaded, sacked, placed directly on pallets, or placed in pallet boxes on pallets. Machinable and nonmachinable pieces may be combined in the same sack or on the same pallet (including pallet boxes on pallets).

Sacked mail must be labeled as follows:

- c. Sorted to optional 5-digit scheme destinations under [L606](#), Column B, and 5-digit destinations, either in sacks or directly on pallets or in pallet boxes. Mailers must enter the pieces at the designated SCF, under [L605](#), that serves the 5-digit ZIP Code destinations of the pieces. The DSCF price is not available for palletized mail for facilities that are unable to handle palletized mailings. Refer

455.4.2.3

to the Drop Shipment Product available from the National Customer Support Center (NCSC) (see [608.8.1](#)) to determine if the facility serving the 5-digit destination can handle pallets.

- d. Any remaining nonmachinable parcels (as defined in [401.2.5.2](#)) sorted to 3-digit ZIP Code prefixes in [L002](#), Column C. Machinable parcels may not be sorted to the 3-digit level.

4.2.3 Sacking and Labeling

Sacking requirements for DSCF entry:

- a. Only 5-digit scheme and 5-digit sacks are permitted.
- b. Each 5-digit scheme and 5-digit sack must contain a minimum of seven pieces. Machinable and nonmachinable pieces may be combined in the same sack to meet this requirement. One overflow sack per 5-digit ZIP Code is permitted (no piece minimum).
- c. 5-digit scheme sack labeling: Line 1, use [L606](#), Column B; for Line 2, "PSVC PARCELS 5D SCH."

- a. DNDC machinable parcels must be sacked under [6.0](#) or prepared on pallets under [705.8.0](#).
- b. DNDC nonmachinable parcels that each weigh 35 pounds or less must be sacked under [6.0](#), if the parcels do not contain perishables and the size of the parcels allows a sack to hold at least two pieces. DNDC nonmachinable parcels that cannot be sacked in this manner or that weigh more than 35 pounds must be transported as outside (unsacked) pieces. If authorized in advance by the USPS, DNDC nonmachinable parcels may be palletized.
