Determining Priority Mail Dimensional Weight**Priority Mail dimensional weight for rectangular shaped parcels to zones 5–8.**

1. Measure the length, width, and height in inches. Round off¹ each measurement to the nearest whole inch: (length = 21, height = 20, and width = 20).
2. Multiply length x height x width: $(21 \times 20 \times 20) = 8,400$ cubic inches.
3. If the result exceeds 1,728 cubic inches, divide the result by 194 and round up² to the next whole number to determine dimensional weight in pounds: $(8,400/194 = 43.29)$ 43.29 rounded up to the next pound is 44.
4. The price is based on the actual weight or dimensional weight, whichever is greater.

In this example the dimensional weight for this rectangular package to zones 5–8 is 44 pounds.

Actual weight
10 pounds

**Priority Mail dimensional weight for nonrectangular shaped parcels to zones 5–8.**

1. Measure the length, width, and height in inches at their extreme dimensions. Round off¹ each measurement to the nearest whole inch: (length = 30, height = 9, and width = 18).
2. Multiply length x height x width: $(30 \times 9 \times 18) = 4,860$ cubic inches.
3. Multiply the result by an adjustment factor of 0.785: $4,860 \times 0.785 = 3,815.1$ cubic inches.
4. If the final result exceeds 1,728 cubic inches, divide the result by 194 and round up² to the next whole number to determine the dimensional weight in pounds: $(3,815.1/194 = 19.66)$ 19.66 rounded up to the next pound is 20.
5. The price is based on the actual weight or dimensional weight, whichever is greater.
6. If the dimensional weight exceeds 70 pounds, the package pays the 70 pound price.

In this example the dimensional weight for this nonrectangular package to zones 5–8 is 20 pounds.

Mailpieces are classified by shape and by the way they are prepared. These classifications are based on how efficiently mailpieces can be processed on Postal Service equipment. The Postal Service classifies letters and cards into one of three categories: machinable, nonmachinable, and automation. For the purposes of determining mailability or machinability, the length is the dimension parallel to the address as read (601.1.4).

Machinable Letters and Cards (201.1.0)

If you prepare your letters and cards so that they have an accurate address and can be processed on Postal Service equipment, your mail is "machinable" and eligible for "presort" rates. Machinable mailpieces must meet specific standards, including size, shape, and weight.

Maximum weight: First-Class Mail, machinable letters and Standard Mail machinable letters: 3.3 ounces, Periodicals letters: 3.5 ounces.

Machinable letters must not meet any of the nonmachinable characteristics (201.2.0).

Dimensions:

- Minimum: 5 inches long, 3-1/2 inches high, and 0.007 inch thick.
- Maximum for First-Class Mail card rates: 6 inches long, 4-1/4 inches high, and 0.016 inch thick.
- Maximum for letters and other cards: 11-1/2 inches long, 6-1/8 inches high, and 1/4 inch thick.
- Rectangular, with four square corners and parallel opposite sides. Letter-size, card-type mailpieces made of cardstock may have finished corners that do not exceed a radius of 1/8 inch.

Nonmachinable Letters (201.2.0)

Maximum weight: First-Class Mail and Periodicals nonmachinable letters 3.5 ounces; Standard Mail nonmachinable letters; 3.3 ounces.

- Presorted First-Class Mail letters are subject to a \$0.20 nonmachinable surcharge if they meet any of the characteristics in 201.2.1. The nonmachinable characteristics do not apply to pieces mailed at card rates.
- Standard Mail letters that weigh 3.3 ounces or less and have one or more of the nonmachinable characteristics in 201.2.1 are subject to the nonmachinable letter rates in 243.1.2.
- Standard Mail letters that weigh more than 3.3 ounces and are prepared as nonmachinable letters are mailable at Not Flat-Machinable rates.

Dimensions: see machinable letters and cards above.

Examples of a nonmachinable letter include:

- It has an aspect ratio (length divided by height) of less than 1.3 or more than 2.5 (a square envelope has an aspect ratio of 1, making it nonmachinable).
- It is more than 4-1/4 inches high or more than 6 inches long and is less than 0.009 inch thick.
- It has clasps, strings, buttons, or similar closure devices.
- It is too rigid.
- It has a delivery address parallel to the shorter side of the mailpiece.
- It contains items such as pens, pencils, or keys that create an uneven thickness.

Additional restrictions apply to self-mailers and booklets.

**Automation
Letters and
Cards
(201.3.0)**

If your letter-size mailpiece is machinable and displays the correct delivery point barcode or Intelligent Mail barcode, you may qualify for lower, "automation" rates. A letter or card meets automation standards and qualifies for automation rates if it meets the specific addressing, barcoding, and design standards.

For additional information, see:

- [Quick Service Guide 201a](#), Designing Letters and Cards for Automated Processing.
- [Quick Service Guide 201b](#), Using Tabs, Wafer Seals, and Glue Strips.

Maximum weight:

- First-Class Mail automation letters: 3.5 ounces.
- Periodicals automation letters: 3.5 ounces.
- Standard Mail automation letters and Enhanced Carrier Route letters: 3.5 ounces.
- See [201.3.13.4](#) for heavy letter mail weighing over 3 ounces.

Shape: rectangular. Aspect ratio (length divided by height): 1.3 to 2.5 ([201.3.3](#)).

Dimensions:

- Minimum: 3-1/2 inches high, 5 inches long, and either 0.007 inch thick if not more than 4-1/4 inches high and 6 inches long; or 0.009 inch thick if more than 4-1/4 inches high or 6 inches long, or both.
 - Maximum for First-Class Mail card rates: 4-1/4 inches high, 6 inches long, and 0.016 inch thick.
 - Maximum for letters and other cards: 6-1/8 inches high, 11-1/2 inches long, and 1/4 inch thick.
- Length is the dimension parallel to the address as read ([601.1.3](#)).

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures must meet the physical standards for automation letters and cards in [201.3.14](#).

Physical Standards (201.3.0, 708.4.0) Must meet all physical standards in [201.3.0](#).
Aspect ratio from 1.3 to 2.5 ([201.3.6](#)).
Dimensions:
■ Minimum: 3-1/2 inches high, 5 inches long, and either 0.007 inch thick if not more than 4-1/4 inches high and 6 inches long; or 0.009 inch thick if more than 4-1/4 inches high or 6 inches long, or both.
■ Maximum for cards at card rates: 4-1/4 inches high, 6 inches long, and 0.016 inch thick.
■ Maximum for letters and other cards: 6-1/8 inches high, 11-1/2 inches long, 1/4 inch thick.
■ Rectangular, with four square corners and parallel opposite sides. Letter-size, card-type mailpieces made of cardstock may have finished corners that do not exceed a radius of 0.125 inch (1/8 inch).

Maximum Weight:

- First-Class Mail Presorted Machinable—3.3 ounces (0.2063 pound).
- First-Class Mail Automation—3.5 ounces (0.2188 pound).¹
- Periodicals Barcoded (Automation)—3.5 ounces (0.2188 pound).¹
- Standard Mail Automation—3.5 ounces (0.2188 pound).¹
- Enhanced Carrier Route—3.5 ounces (0.2188 pound).¹

1. Heavy letters over 3 ounces must bear an address block delivery point barcode under [201.3.13.4](#), be part of a 100% delivery point or Intelligent Mail barcoded mailing, and be prepared in a sealed envelope. Heavy letters may not contain stiff enclosures or be prepared as a self-mailer or booklet-type mailpiece.

Prohibitions:

- Polywrap, polybag, and shrinkwrap.
- Clasps, strings, staples, buttons, or protrusions that might impede or damage the mail or mail processing equipment ([201.3.4](#)).

Other machinability standards:

- Rigid and odd-shaped items ([201.3.9](#)).
- Tabbing for self-mailers or booklets with open edges (see [201.3.13](#) or [Quick Service Guide 201b](#)).

Pieces with delivery point barcodes or Intelligent Mail barcodes must meet all standards in [708.4.0](#):

- Format of barcode bars (e.g., dimensions and spacing, [708.4.2](#)).
- Minimum clearance around barcode for barcodes printed on a mailpiece or label: 1/8 inch on left and right sides; 1/25 inch above and below barcode.
- Placement of address block barcode, lower right barcode, or barcode within a window: see page two.
- Reflectance standards for barcode and portion of mailpiece on which barcode is printed ([708.4.4](#)).

Barcode in Address Block (202.5.0)

When the barcode is included as part of the address block the barcode must be placed in one of these positions:

- Above the address line containing the recipient's name.
- Below the city, state, and ZIP Code line.
- Above or below the keyline information.
- Above or below the optional endorsement line.

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Physical Standards for Automation-Compatible Mail (201.3.0)

Barcode Location: delivery point barcode or Intelligent Mail barcode either within address block or within barcode clear zone in lower right corner of mailpiece (202.5.0).

Address Block Barcode: (202.5.0) Within address block (shown by dashed lines) must be:

- Rightmost bar—at least 1/2 inch from right edge of the mailpiece.
- Leftmost bar—less than 10-1/2 inches from right edge, and at least 1/2 inch from the left edge.
- Top of each bar—less than 4 inches from bottom edge of mailpiece.
- Bottom line in address block including barcode—at least 5/8 inch from bottom edge of the mailpiece.

The minimum clearance between the barcode and any information line above or below it within the address block must be at least 0.040 (1/25) inch for POSTNET barcode or 0.028 inch for an Intelligent Mail barcode. The separation between the barcode and the top line or bottom line of the address block must not exceed 0.625 (5/8) inch.

Recommended Address Placement:

On a letter-size piece, the recommended address placement is within the optical character reader (OCR) read area, which is a space on the address side of the mailpiece defined by these boundaries (202.2.1):

- Left: 1/2 inch from the left edge of the piece.
- Right: 1/2 inch from the right edge of the piece.
- Top: 2-3/4 inches from the bottom edge of the piece.
- Bottom: 5/8 inch from the bottom edge of the piece.

Barcode Skew: The combined effects of positional skew (slant or tilt of the entire barcode baseline) and rotational skew (slant or tilt of the individual barcode bars) for a barcode on a card-size or a letter-size piece must be limited to a maximum rotation of the bars of ± 5 degrees from a perpendicular to the bottom edge of the piece. The individual bars of a barcode must not shift (be vertically offset) more than 0.015 inch from the average baseline of the barcode (708.4.4.1).

Envelope Window and Label Placement:

- 0.125 (1/8) inch—minimum clearance between leftmost and rightmost bars and any printing or window edge.
- 0.040 (1/25) inch—minimum clearance between POSTNET barcode and top and bottom edges of window.
- 0.028 inch—minimum clearance between Intelligent Mail barcode and top and bottom edges of window.

For envelope window, a clear space must be maintained when insert is moved to its full limits in each direction within envelope (202.5.0).

Address Label Barcode Placement:

- 0.125 (1/8) inch—minimum clearance between the barcode and the left and right edges of the address label.
- 0.040 (1/25) inch—minimum clearance between POSTNET barcode and top and bottom edges of address label.
- 0.028 inch—minimum clearance between Intelligent Mail barcode and top and bottom edges of address label.

For Barcode in Lower Right Corner Location: Leftmost bar between 4-1/4 inches and 3-1/2 inches from right edge (202.5.0).

Barcode Window: If the barcode is printed on an insert to appear through a window in the lower right corner, see 202.5.7.

- Overview** Unenveloped letter-size mailpieces prepared for automation rate mailings must be secured (tabbed) to prevent an open edge from jamming high-speed processing equipment. Standards for tabbing are based on basis weight of paper stock used and the location of the folded or bound edge. As an alternative to tabs or wafer seals, the open edge of the length of the mailpiece may be continuously glued or spot glued. Continuous glue or spot glue is permissible with single-sheet self-mailers and cards.
- Physical Standards (201.3.10)** Number and location of tabs or wafer seals are specified for particular types of letter-size mail. In all cases, additional tabs may be used.
- Tabs, wafer seals, cellophane tape, or permanent glue (continuous or spot) must not interfere with recognition of the barcode, rate marking, postage identification, or required address information. In all cases additional tabs or seals may be used. Cellophane tape is not acceptable within the barcode clear zone. Tabs or wafer seals placed in the barcode clear zone must contain a paper face meeting the standards for background reflectance and, if the barcode is not preprinted by the mailer, the standards for water-based ink.
- Adequate adhesion is required.
- Basis weight: the minimum basis weight standards vary, depending on the construction of the mailpiece (see reverse) and the sheet size below.
- Letter-Size Folded Self-Mailers (201.3.13)** Folded edge (top or bottom) must be parallel to the longest dimension (length) and address of the mailpiece.
- With one tab or wafer seal: folded edge at bottom of mailpiece, tab or wafer seal in middle of top edge of mailpiece.
- Single folded sheet, sealed with one tab or wafer seal, minimum basis weight: 28 pounds (17 by 22 inches by 500 sheets) or 70 pounds (25 by 38 inches by 500 sheets).
 - Two or more sheets, sealed with one tab or wafer seal, minimum basis weight: 24 pounds (17 by 22 inches by 500 sheets) or 60 pounds (25 by 38 inches by 500 sheets).
- With two tabs or wafer seals: minimum basis weight 20 pounds (17 by 22 inches by 500 sheets) if folded edge is at top or bottom of the mailpiece. Tabs or wafer seals must be placed within 1 inch of the right and left edges of mailpiece (see reverse).
- With folded edge on right (leading) edge: left (trailing) edge and other open edges must be secured with at least one tab or a glue line; additional tabs may be required based on trim size and basis weight.
- Letter-Size Booklet-Type Mailpiece (201.3.13.2)** The bound edge (spine) must be at the bottom and parallel to the longest dimension (length) and the address of the mailpiece, unless preapproved by the USPS. The mailpiece must be tabbed (secured) in one of two ways:
- Top (unbound edge) must have at least two tabs or wafer seals placed within 1 inch of the right and left edges (see reverse).
 - The right (leading) and left (trailing) edges must be secured with tabs or wafer seals placed within 1 inch of the top right and top left edges of the mailpiece.
- Cover must have a minimum basis weight of 20 pounds.
- With spine on right (leading) edge: minimum basis weight 20-pound bond paper. Address must be parallel to longest dimension (length) and unbound left (trailing) edge must be tabbed (secured):
- If no more than 4-1/4 inches high and 6 inches long, 1 tab or wafer seal in middle of trailing left edge.
 - If more than 4-1/4 inches high or more than 6 inches long, 2 tabs or wafer seals within 1 inch of top and bottom edges.
- Postcard (201.3.13.4)** Minimum basis weight 75 pounds or greater. Double postcards must have folded edge at the top or bottom. The open edge must be secured with one tab in the middle.
- Flat-Size Booklet-Type Mailers (301.3.6)** The contents of the mailpiece prepared in sleeves or other wrappers must be sufficiently secure in the sleeve or wrapper to stay in place during processing. If material bearing the delivery information or barcode for the mailpiece is enclosed in a partial wrapper, that wrapper must be sufficiently secure to prevent the contents from shifting and obscuring the delivery address or barcode.
- For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Overview The Move Update standard is a means of reducing the number of mailpieces in a mailing that require forwarding or return by periodic matching of a mailer's address records with customer-filed change-of-address orders received and maintained by the Postal Service. Mailers who claim presorted or automation rates for First-Class Mail must demonstrate that they have updated their mailing list within 185 days before the mailing date. The Postal Service offers four preapproved methods: Address Change Service (ACS), National Change of Address Linkage System (NCOA^{Link}), *FASTforward*, and ancillary service endorsements except for Forwarding Service Requested. Alternative methods that require separate approval also are offered for First-Class Mail mailings. Mailers must use one of the preapproved or alternative methods to meet the Move Update standard.

Effective November 23, 2008, the minimum frequency for Move Update will increase from 185 days to 95 days prior to the date of mailing and the Move Update standard will also be required for all Standard Mail. The Move Update standard is met when an address used on a mailpiece in a mailing for any class of mail is updated with an approved method and the same address is used in a First-Class Mail or Standard Mail mailing within 95 days after the address has been updated. Except for mail bearing an alternative address format, addresses used on all pieces claiming Standard Mail rates will be required to meet the Move Update standard.

Address Change Service (507.4.2) Address Change Service (ACS) is an electronic enhancement to traditional, manual methods of providing change-of-address (COA) information to mailers. The system is designed to reduce the volume of manual (printed) address-correction notifications handled by both the Postal Service and mailers and to centralize and automate the provision of address correction information to mailers. Mailers add a unique mailer identification code to the address area of their mailpieces to identify them as ACS participants. ACS may be used on any class of mail to qualify the addresses in a mailing list that is also used for First-Class mailings. First-Class mailers who are ACS participants may use the ancillary service endorsement "Change Service Requested" to receive an electronic notice of the change-of-address information and prevent the mailpiece from being forwarded to the new address or returned to the sender. Electronic notices can be obtained on a variety of electronic media.

Per electronic notice (or manual notice for electronic option customers) issued:

- First-Class Mail—\$0.08
- Other than First-Class Mail—\$0.25

Per automated notice issued (with OneCode ACS and Intelligent Mail barcode):

- First-Class Mail letters (first two notices)—\$0.00
- First-Class Mail letters (per additional notice)—\$0.06
- Standard Mail letters (first two notices)—\$0.03
- Standard Mail letters (per additional notice)—\$0.18

A mailer may determine the frequency with which to use an ancillary endorsement and ACS participant code, as long as the mailer can certify that each address in a First-Class mailing has been updated for customer moves within 185 days before the mailing date.

ACS is available for First-Class Mail, Periodicals, and Standard Mail. ACS is available monthly, weekly, or more frequently, depending on the needs and ACS volume of the mailer. ACS via electronic notification is not available from all post offices.

See example of an ACS code in [Quick Service Guide 708](#), Optional Information Lines.

Benefits:

- ACS provides significant cost-saving benefits to mailers and the Postal Service.
- ACS participants can use electronically generated address correction information to update their mailing lists more easily and in a more timely manner.

**National Change
of Address
Linkage System**
(Letters [233.3.5](#)
Flats [333.3.5](#)
Parcels [433.3.5](#))

National Change of Address Linkage System (NCOA^{Link}) is an address correction service provided to mailers through companies licensed by the Postal Service. Updated change-of-address information for the entire country is provided on a regular basis to the licensees by the Postal Service. The licensees match mailing lists submitted to them by mailers on tape or disk against the computerized information. If a match is made, NCOA^{Link} can correct the address before it is printed.

Benefits:

- Reduces undeliverable mail by providing the most current address information, including standardized and delivery point coded addresses, for matches made to the NCOA^{Link} file for individual, family, and business moves.
- Prevents remailings after address corrections are received because the address correction is applied prior to the mailing.
- Reduces mailer costs by reducing the number of undeliverable mailpieces.
- Provides faster product/service marketing through accurate mail delivery.

For more information about NCOA^{Link}, including a list of licensees, see Postal Explorer (pe.usps.com) > Address Quality > Address Management Services > Move Update > [NCOA^{Link} Systems](#).

FASTforward
([507.4.3](#))

The *FASTforward* system consists of a Postal Service-owned and user-licensed computer system containing *FASTforward* name- and address-matching software and a change-of-address database. The *FASTforward* database is updated weekly.

FASTforward is available in two distinct versions.

Multiline optical character readers (MLOCRs) – Licensed *FASTforward* MLOCR users must obtain an approved interface from their MLOCR vendors.

For a list of *FASTforward* licensees, see Postal Explorer (pe.usps.com) > Address Quality > Address Management Services > Move Update > *FASTforward* > Licensees.

Benefits: When *FASTforward* is used in conjunction with either MLOCR (and/or RVE) processing, mailpieces avoid the delays associated with traditional mail forwarding.

**Ancillary
Service
Endorsements**
([507.1.5](#))

Any mailer may use one of the four ancillary service endorsements below to request a printed notification of the addressee's new address and provide the Postal Service with instruction on how to handle undeliverable-as-addressed mail.

Mailers may use the following endorsements with First-Class Mail service to initiate this updating method:

Address Service Requested: The mailpiece is forwarded to the new location when possible and a printed notice is returned to the mailer with the new address information. This notice is then used by the mailer to update the address list.

- Months 1-12: the mailpiece is forwarded at no charge; the mailer is provided a separate notice of new address and charged an address correction fee (manual \$0.50, electronic, see page one).
- Months 13-18: the mailpiece is returned with the new address attached at no charge.
- After month 18 or if undeliverable at any time: the mailpiece is returned with reason for nondelivery attached at no charge.

Return Service Requested: The mailpiece is returned with the new address information affixed. No forwarding service is provided. This service is provided with First-Class Mail at no charge. The mailer then updates the address information in the file and may mail a new piece to the new address.

Change Service Requested: A separate notice of new address or reason for nondelivery is provided (in either case, an electronic address correction fee is charged); the mailpiece is disposed of by USPS. This endorsement is available only when used in conjunction with electronic Address Change Service.

Temp-Return Service Requested: The mailpiece is returned with the new address or reason for nondelivery attached. If this is a temporary change of address, the piece is forwarded; no separate notice of new temporary change-of-address is provided.

For an address to meet the Move Update requirement, the mailer must send at least one letter or card to the address with an approved ancillary service endorsement within 185 days before reuse of the address in a First-Class discounted mailing. To complete the Move Update process, the mailer must make the address changes received as a result of the use of the approved ancillary service endorsement. It is recommended that mailers retain address correction records for up to two years.

Benefits: Ancillary service endorsements allow the sender to obtain, on request, the addressee's new (forwarding) address (if the addressee filed a change-of-address order with the Postal Service) or the reason for nondelivery. These endorsements also provide the Postal Service with instructions for the disposition of undeliverable-as-addressed mail.

Bundling required for mailings consisting entirely of card-size pieces and for pieces in overflow and less-than-full trays. The maximum thickness for a bundle is 6 inches.

1. For the 5-digit price, prepare all possible 5-digit scheme trays, then prepare all possible 5-digit trays. Mailers must prepare all possible 3-digit scheme trays, then prepare all possible 3-digit trays.
2. Instead of preparing overflow trays with fewer than 150 pieces, mailers may include pieces in the next tray level if it results in at least 150 pieces in that tray. The price is based on the overflow tray that would have been made (i.e., pieces placed in a 3-digit tray in lieu of 5-digit overflow trays are eligible for the 5-digit price). Pieces placed in the next tray level must be grouped by destination and placed in the front of the tray. This option may be used selectively for 3-digit/scheme and AADC ZIP Codes. The overflow option does not apply to 3-digit origin trays.
3. AADC price for any 3-digit/scheme tray for the origin SCF area containing fewer than 150 pieces.
4. Use "5D BC" on 5-digit trays; on 5-digit scheme trays, use "BC 5D SCHEME."

Bundling not permitted except for mailings of card-size pieces and for pieces placed in less-than-full 3-digit origin or mixed AADC trays.

1. Instead of preparing overflow trays, mailers may include pieces in the mixed AADC trays. Pieces placed in a mixed AADC tray in lieu of an AADC overflow tray are eligible for the AADC price. Pieces must be grouped by destination and placed in the front of the tray.

There are no Standard Mail card prices; cards may be mailed at letter prices.

Destination discounts apply to mail prepared as prescribed by USPS and addressed for delivery within service area of destination BMC/ASF or SCF ([246.2.0](#)).

Annual \$180.00 presort mailing fee.

Content (243.2.0)

Letters containing mailable items not required to be sent using First-Class Mail can be sent using Standard Mail. Standard Mail is typically used for advertisements and flyers. Additional content restrictions must be met for authorized nonprofit mailers ([703.1.0](#)).

Eligibility Standards (243.7.0)

Mailings of 200 or more addressed pieces must be 100% delivery point or Intelligent Mail barcoded ([708.4.0](#)), sorted, and marked as described below. All pieces must be automation compatible ([201.3.0](#)). Pieces are eligible if not required to be mailed at First-Class Mail prices or not eligible for Periodicals prices. Nonprofit prices require specific authorization ([703.1.0](#)).

Each piece must also include a complete delivery address with correct ZIP Code or ZIP+4 code.

For address standards, see [243.7.4](#); for barcode quality standards, see [708.4.0](#) and CASS/MASS standards in [708.3.0](#).

Addresses matched using CASS/MASS-certified process within 180 days before mailing date.

All letter-size reply cards and envelopes (business reply, courtesy reply, and metered reply mail) provided as enclosures must meet the standards in [201.3.14](#).

Mailers can apply Repositionable Notes for an additional charge of \$0.015. See [705.21.0](#).

Effective November 23, 2008, addresses on all pieces must be updated within 95 days before mailing through a USPS-approved address update method (e.g., ACS, NCOA^{Link}, *FASTforward*, or the appropriate ancillary service endorsement (except Forwarding Service Requested) under [507.1.5.3](#)). For an overview of the Move Update standards, see [Quick Service Guide 230a](#).

Postage Payment and Documentation (244)

Precanceled stamp ([604.3.0](#)), meter ([604.4.0](#)), or permit imprint ([604.5.0](#)).

Additional standards apply to mailings of nonidentical-weight pieces.

Documentation:

■ Postage statement:

Regular: PS Form 3602-R, or approved facsimile.

Nonprofit: PS Form 3602-N, or approved facsimile.

■ PS Form 3553 must be retained for 1 year ([708.3.5.2](#)).

■ Supporting documentation: required unless correct price is affixed to each piece or unless each piece is of identical weight and separated by price when presented for acceptance; documentation generated by PAVE-certified software (or printed in standardized format).

Mail Preparation (245.7.0)

Marking on each piece in the postage area ([202.3.0](#)):

■ **Regular:** "Presorted Standard" or "PRSRT STD."

■ **Nonprofit:** "Nonprofit Organization" or "NONPROFIT ORG." or "NONPROFIT."

Pieces with a delivery point barcode or an Intelligent Mail barcode printed in the barcode clear zone must also bear an "AUTO" marking. For price markings applied by a MLOCR, see [202.3.5](#). Pieces not claimed at an automation price must not bear an "AUTO" marking unless First-Class Mail single-piece postage is affixed or a corrective single-piece price marking is applied.

When preparing full trays, mailers must fill all possible 2-foot trays first; if there is mail remaining for the presort destination, mailers must use a combination of 1-foot and 2-foot trays that result in the fewest total number of trays for that presort level.

Barcoded tray labels required ([245.4.9](#)).

See page two for preparation and labeling.

Trays on pallets ([705.8.5](#)) are permitted and preferred.

Trays must be sleeved and strapped ([246.3.4](#)). See [245.3.5](#) for exceptions to strapping for mailings that originate and destinate in delivery area of same SCF. Strapping not required on trays placed on 5-digit, 3-digit, and SCF pallets that are secured with stretchwrap.

Traying Sequence (245.7.5)

5-Digit/Scheme¹

Trays: Optional, but 5-digit/scheme trays required for price. 150-piece minimum to same 5-digit/scheme destination; only one overflow tray permitted per destination.²

Barcoded Labels: For Line 1: For 5-digit scheme trays, use destination in City State Product. For 5-digit trays, use city, state, and 5-digit ZIP Code on mail.

Price: 5-Digit

3-Digit/Scheme¹

Trays: Required, at least 150 pieces to same 3-digit/scheme destination; only one overflow tray permitted per destination.²

Optional: One less-than-full tray may be prepared for any remaining pieces for each 3-digit/scheme of SCF serving post office where mail is verified.

Barcoded Labels: For Line 1, use L002, Column B, for destination facility.

Price: 3-Digit or AADC³

AADC

Trays: Required, at least 150 pieces to same AADC (see L801); group pieces within trays grouped by 3-digit/scheme; only one overflow tray permitted per destination.²

Barcoded Labels: For Line 1, use L801, Column B, for destination facility.

Price: AADC

Mixed AADC

Trays: Required for all remaining pieces placed in mixed AADC trays; group pieces within trays by AADC; only one less-than-full tray permitted per mailing.

Barcoded Labels: For Line 1, L011, Column B (for BMC/ASF entry, use L010, Column B).

Price: Mixed AADC

Bundling not permitted except for mailings of card-size pieces and for pieces in overflow and less-than-full trays. The maximum thickness for a bundle is 6 inches.

1. For the 5-digit price, all possible 5-digit scheme trays must be prepared, then all possible 5-digit trays. Mailers must prepare all possible 3-digit scheme trays, then prepare all possible 3-digit trays.
2. Instead of preparing overflow trays with fewer than 150 pieces, mailers may include pieces in the next tray level if it results in at least 150 pieces in that tray. The price is based on the overflow tray that would have been made (i.e., pieces placed in a 3-digit tray in lieu of 5-digit overflow trays are eligible for the 5-digit price). Pieces placed in the next tray level must be grouped by destination and placed in the front of the tray. This option may be used selectively for 3-digit/scheme and AADC ZIP Codes. The overflow option does not apply to origin/entry 3-digit trays.
3. AADC price for any 3-digit/scheme tray for the origin SCF area containing fewer than 150 pieces.
4. Use "5D BC" on 5-digit trays; use "BC 5D SCHEME" on 5-digit scheme trays.
5. Use "3D BC" on 3-digit trays; use "BC 3D SCHEME" on 3-digit scheme trays and, if applicable, as shown in L002, Column B, followed by the letter "A," "B," or "C."

Overview

Flat Dimensions

	Minimum*	Maximum
Length	11-1/2 inches	15 inches
Height	6-1/8 inches	12 inches
Thickness	1/4 inch	3/4 inch

* Flats exceed at least one of these dimensions

For physical standards of automation flats, see [Quick Service Guide 301a](#).

In addition to shape, the Postal Service classifies mailpieces by the way they are prepared. These classifications are based on how efficiently your mailpieces can be processed on Postal Service equipment. The Postal Service classifies commercial flats as either nonautomation or automation flats or machinable and nonmachinable for Periodicals.

A flat meets automation standards and qualifies for automation prices if it meets the specific addressing, barcoding, and design standards. Automation price flats must have a delivery point barcode, ZIP+4 barcode, or an Intelligent Mail barcode.

Dimensions, Shape, Flexibility, and Uniform Thickness (301.1.0)

Dimensions:

- Minimum: more than 11-1/2 inches long, or more than 6-1/8 inches high, or more than 1/4 inch thick.
- Maximum: 15 inches long, 12 inches high, and 3/4 inch thick.

The length of a flat-size mailpiece is the longest dimension. The height is the dimension perpendicular to the length.

Shape: rectangular, with four square corners, or with finished corners that do not exceed a radius of 0.125 inch (1/8 inch).

Flexibility: flat-size piece must meet flexibility criteria in [301.1.3](#).

Uniform thickness: the contents must be uniformly thick so that any bumps, protrusions, or irregularities do not cause more than 1/4 inch variance in thickness ([301.1.4](#)). When determining variance in thickness, exclude the outer edges of a mailpiece (1 inch from each edge) when the contents do not extend to the edges.

Mailpieces that do not meet the standards for flexibility in [301.1.3](#), or for uniform thickness in [301.1.4](#), must pay applicable prices as follows:

- First-Class Mail—parcel prices.
- Standard Mail—Not Flat-Machinable or parcel prices.
- Bound Printed Matter—parcel prices.

Presorted Nonautomation Flats (301.2.0)

Maximum weight:

- First-Class Mail: 13 ounces.
- Standard Mail: less than 16 ounces.
- Bound Printed Matter: 15 pounds.

Automation Flats (301.3.0)

Flats may qualify for the automation discount based on the physical standards in [301.3.0](#).

See [Quick Service Guide 301a](#), Designing Flats for Automated Processing, for an overview.

Standard Mail Not Flat-Machinable Pieces (401.2.2)

For Standard Mail Not Flat-Machinable pieces, see [Quick Service Guide 401](#).

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Overview Flat-size pieces meeting the applicable automation standards in [301.3.0](#) are entitled to automation or Periodicals machinable prices. Size, weight, thickness, polywrap, and flexibility standards vary for the class of mail. For eligibility and preparation standards for specific price options, see the appropriate Quick Service Guide above.

Physical Standards (301.3.0) Shape: rectangular, with four square corners, or with finished corners that do not exceed a radius of 0.125 inch (1/8 inch).
Dimensions:
■ Minimum height is 5 inches. Maximum height is 12 inches.
■ Minimum length is 6 inches. Maximum length is 15 inches.
■ For bound or folded pieces, the edge perpendicular to the bound edge or folded edge may not exceed 12 inches.
■ Minimum thickness is 0.009 inch. Maximum thickness is 0.75 inch.
The length of a flat-size mailpiece is the longest dimension. The height is the dimension perpendicular to the length ([301.1.2](#)).
Maximum weight:
■ First-Class Mail: 13 ounces.
■ Periodicals: 20 ounces for pieces prepared under [301.3.0](#).
■ Standard Mail: less than 16 ounces.
■ Bound Printed Matter: 20 ounces.
Uniform thickness: The contents must be uniformly thick so that any bumps, protrusions, or irregularities do not cause more than 1/4 inch variance in thickness. The mailpiece must have a smooth and regular shape and be free of creases, folds, tears, or other irregularities ([301.3.6](#)).
Flexibility and deflection: automation flats must meet the flexibility standards in [301.1.3](#) and deflection standards in [301.3.2.3](#).
Polywrap films and similar coverings must meet the standards in [301.3.3](#). A list of approved polywrap and polywrap manufacturers is available on ribbs.usps.gov. The wrap direction must be around the longer axis of the mailpiece, with the seam parallel to that axis. The longer axis is always parallel to the length of the mailpiece. The preferred seam placement is on the nonaddressed side of the mailpiece.
Prohibitions: Clasps, strings, buttons, or other protrusions; also staples, unless properly used as a binding method ([301.3.6](#)).

Barcodes (302.4.0) Barcodes must be at least 1/8 inch from any edge of the address side.
Address block barcodes must be in one of these four positions:
■ Above the address line containing the recipient's name.
■ Below the city, state, and ZIP Code line.
■ Above or below the keyline information.
■ Above or below the optional endorsement line.
The surface the barcode is printed on must meet the reflectance standards in [708.4.4](#).
The minimum clearance between the barcode and any information line above or below it within the address block must be at least 0.040 (1/25) inch for POSTNET barcode or 0.028 inch for an Intelligent Mail barcode. The separation between the barcode and the top line or bottom line of the address block must not exceed 0.625 (5/8) inch. The clearance between the leftmost and rightmost bars and any printing must be at least 0.125 (1/8) inch.

Window Envelope Barcode Placement:

- 0.125 (1/8) inch—minimum clearance between the leftmost and rightmost bars and any printing or window edge.
 - 0.040 (1/25) inch—minimum clearance between POSTNET barcode and top and bottom edges of window.
 - 0.028 inch—minimum clearance between Intelligent Mail barcode and top and bottom edges of window.
- For envelope window, a clear space must be maintained when insert is moved to its full limits in each direction within envelope ([202.5.0](#)).

Address Label Barcode Placement:

- 0.125 (1/8) inch—minimum clearance between the barcode and the left and right edges of the address label.
- 0.040 (1/25) inch—minimum clearance between POSTNET barcode and top and bottom edges of address label.
- 0.028 inch—minimum clearance between Intelligent Mail barcode and top and bottom edges of address label.

Maximum: 15 inches

Maximum: 3/4 inch

Maximum Weight

- First-Class Mail cannot weigh more than 13 ounces.

Flexibility

Must meet flexibility standards in [301.1.3](#) and deflection standards in [301.3.2.3](#).

Polywrapped Pieces

Must meet all six properties in Exhibit [301.3.3.1](#).

If an address label is used on the outside of the polywrapped piece, the haze property is not required. Polywrap seam must be parallel to longest dimension.

The preferred seam placement is on the nonaddressed side of the mailpiece. If seam is on the addressed side, it must not cover the delivery address, barcode, postage area, or any required markings.

Flat-Size Booklet-Type Mailpieces (301.3.6.3)

The contents of the mailpiece prepared in sleeves or other wrappers must be sufficiently secure in the sleeve or wrapper to stay in place during processing. If material bearing the delivery information or barcode for the mailpiece is enclosed in a partial wrapper, that wrapper must be sufficiently secure to prevent the contents from shifting and obscuring the delivery address or barcode.

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Overview

Parcel Dimensions

Length	The longest side of the parcel.
Girth	Measurement around the thickest part.
Length plus girth	Cannot exceed 108 inches (Parcel Post cannot exceed 130 inches).

Measuring Length Plus Girth (401.1.0)

For parcels, length is the measurement of the longest dimension and girth is the distance around the thickest part (perpendicular to the length). Except for Parcel Post and Parcel Select, no mailpiece may measure more than 108 inches in length and girth combined. Parcel Post and Parcel Select pieces measuring over 108 inches but not more than 130 inches in combined length and girth are mailable at the applicable oversized price (453.1.0).

Length = 10 inches
Girth (8 + 5 + 8 + 5) = 26 inches
Length + girth = 36 inches

Length = 20 inches
Girth (6 + 6 + 6) = 18 inches
Length + girth = 38 inches

The Postal Service classifies parcels as machinable parcels, irregular parcels, or outside parcels.

Machinable Parcels (401.1.5)

If you prepare your discount parcels so that they can be processed on Postal Service equipment, your mail is "machinable." Machinable parcels must meet specific standards for size, shape, content, and weight. Minimum weight: 6 ounces (3.5 ounces for parcels prepared under 401.1.5.2). Maximum weight: 35 pounds (25 pounds for books and other printed matter). Lower weight limits apply to First-Class Mail, Standard Mail, and Bound Printed Matter.

Dimensions:

- Minimum: 6 inches long, 3 inches high, and 1/4 inch thick. A mailpiece exactly 1/4 inch thick is subject to the 3-1/2 inch height minimum.
- Maximum: 34 inches long, 17 inches high, and 17 inches thick.

Soft goods wrapped in paper or plastic bags and enveloped printed matter are machinable only if all packaging standards in 601.2.0 are met.

Examples of Balloon Price, Oversized Price, and Priority Mail Dimensional Weight

Priority Mail (zones 1–4) and Parcel Select (all zones) Balloon Price if:

- Weight less than 20 pounds and length plus girth combined is more than 84 but not more than 108 inches.

Nonmachinable Price: No
Balloon Price: Yes
Oversized Price: No

In this example, length and girth is 90 inches.

Priority Mail (zones 5-8) Dimensional weight for rectangular shaped parcels.

For Priority Mail dimensional weight for nonrectangular shaped parcels to zones 5–8, see [123.1.3.2](#).

Dimensional Weight: Yes

Balloon Price: No

In this example the dimensional weight for a package to zones 5–8 is 44 pounds.

- Round off each measurement to the nearest whole number (length = 21, height = 20, and width = 20).
- Multiple length x height x width (21 x 20 x 20) = 8,400 cubic inches
- If more than 1,728 cubic inches, divide the result by 194 and round up to the next whole number to determine dimensional weight (8,400/194 = 43.29). Dimensional weight = 44 pounds.

Parcel Select

Nonmachinable Surcharge if:

- Length more than 34 inches or
- Height more than 17 inches or
- Width more than 17 inches or
- Weight more than 35 pounds (25 pounds for books and other printed matter) or
- Meets any Parcel Post nonmachinable criteria on page three.

The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

Nonmachinable Price: Yes

Balloon Price: No

Oversized Price: No

In this example, length and girth is 82 inches.

Parcel Select

Oversized Price if:

- Length plus girth combined is more than 108 but not more than 130 inches.

The oversized price does not apply to pieces with special handling fee.

Oversized Price: Yes

In this example, length and girth is 130 inches.

Balloon price: Priority Mail (zones 1–4) and Parcel Select only.

Nonmachinable price: Parcel Select only.

Oversized price: Parcel Select only

Priority Mail dimensional weight zones 5–8 only.

Not Flat-Machinable Decision Tree

Standard Mail mailpieces that are too thick or too rigid to run on automated flat sorting machines do not qualify for automation prices. These pieces are now categorized as "Not Flat-Machinable." This new category has higher prices than flats but lower prices than other parcels. This decision tree will help you determine if your piece qualifies as an automation flat or a Not Flat-Machinable.

1. Does your mailpiece:
 - a) Meet the minimum and maximum dimensions for an automation flat (see graphic on right), and
 - b) Have a rectangular shape, and
 - c) Meet the flexibility criteria in [301.1.3](#), and
 - d) Meet the uniform thickness criteria in [301.1.4](#), and
 - e) Meet the deflection (droop) criteria in [301.3.2.3](#) for flimsy pieces?

If yes, it meets the physical standards for an automation flat.
If no, go to number two.

2. Does your mailpiece:
 - a) Exceed one or more of the maximum dimensions for a letter and not measure more than 12 inches high or 15 inches long, or more than 3/4 inch thick, and
 - b) Meet criteria b, c, and d above?

If yes, it meets the physical standards for a nonautomation flat.
If no, go to number three.

3. Is your mailpiece **rigid** or not uniformly thick with the following dimensions?

- a) At least 4 inches high, but not more than 12 inches high.
- b) At least 4 inches long, but not more than 15-3/4 inches long.
- c) At least 0.009 inch thick, but not more than 1-1/4 inches thick.
(Pieces less than 5 inches long must be over 1/4 inch thick.)

If yes, it meets the physical standards for a Not Flat-Machinable piece.
If no, go to number four.

4. Is your mailpiece **flexible** with the following dimensions?

- a) At least 4 inches high, but not more than 12 inches high, with either of the following dimensions:
- b) Over 15 inches long, but not more than 15-3/4 inches long.
- c) Over 3/4 inches thick, but not more than 1-1/4 inches thick.

If yes, it meets the physical standards for a Not Flat-Machinable piece.

Standard Mail flats and Not-Flat Machinable pieces must weigh less than 16 ounces.

Nonmachinable letter-size pieces weighing more than 3.3 ounces, unless they qualify to be mailed at automation flat-size prices, also qualify as Not Flat-Machinable pieces.

Overview For an annual permit fee, a business reply mail (BRM) permit is available for distributing business reply cards, envelopes, self-mailers, cartons, and labels. BRM allows the permit holder to receive First-Class Mail and Priority Mail back from customers by paying postage only on the mail returned. The BRM permit holder guarantees payment of First-Class Mail postage plus a per piece charge for pieces returned by the USPS (see payment options below). When designing a BRM mailpiece or label, mailers must consult with their local post office. The piece must conform to a specific format to qualify as BRM, including a unique ZIP+4 code assigned by the USPS. Proofs for regular BRM should be approved by the USPS before printing. Proofs for Qualified Business Reply Mail (QBRM) must be approved by the USPS. On page two is a layout example for a BRM envelope. BRM pieces distributed in automation price mailings are required to meet automation compatibility standards. BRM templates are available on the Postal Explorer Web site at pe.usps.com by selecting "Mailpiece Design" in the left frame.

A unique ZIP+4 code is assigned by the USPS for each price category of QBRM to be returned (one for card-price pieces, one for letter-size pieces weighing 1 ounce or less, and one for letter-size pieces weighing over 1 ounce up to 2 ounces). Best suited if return volume is approximately 844 pieces or more annually.

Cost per piece	Card Price	\$0.247	+	\$0.05	=	\$0.297
QBRM postage + \$0.05	Letter (1 oz.)	0.397	+	0.05	=	0.447

High-Volume QBRM—Annual permit fee (\$180.00) and a BRM annual account maintenance fee (\$565.00) and separate quarterly fee of \$1,855.00. Mailers can pay quarterly fee for any consecutive 3-calendar-month period. Per piece charge \$0.006 plus lower QBRM automation First-Class Mail postage price. Paid through an advanced deposit account. Best suited if return volume is approximately 42,160 pieces or more quarterly.

Cost per piece	Card Price	\$0.247	+	\$0.006	=	\$0.253
QBRM postage + \$0.006	Letter (1 oz.)	0.397	+	0.006	=	0.403

Other Post Offices A BRM permit holder can allow its authorized representatives or agents to use that permit number to receive BRM at any post office. The original permit holder must supply the representative with a letter authorizing the use of the BRM permit and a copy of the USPS receipt showing the annual fee payment for that permit. See [507.9.11](#) for additional requirements.

Official Mail Authorized users of official mail may distribute BRM, subject to [703.7.11](#) and [507.9.0](#).

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Business Reply Mail Layout Guidelines (507.9.8)

Permit Holder Space: May contain information such as return address, logos, distribution codes, and form numbers.

Company Logo: For barcoded pieces, a company logo is permitted in the address block if it is placed no lower than 5/8 inch from the bottom edge of the mailpiece and does not interfere with the barcode clear zone.

Postage Paid Line: Place the endorsement "POSTAGE WILL BE PAID BY ADDRESSEE" (in capital letters) under the business reply legend box.

Business Reply Legend: The words "BUSINESS REPLY MAIL" are required above the address in capital (uppercase) letters. Immediately below, place the words "FIRST-CLASS MAIL PERMIT NO." followed by the permit number and the name of the issuing post office (city and state) in capital letters.

Facing Identification Mark (FIM): A FIM pattern (specifically FIM B without barcode or FIM C with barcode) is required on all BRM postcards and letter-size mailpieces. The FIM clear zone must contain no printed matter other than the FIM pattern. FIM bars must be between 1/2 and 3/4 inch high and 0.03125 inch (1/32 inch) (± 0.008 inch) wide.

Postage Imprint: "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES" must appear in the upper right corner of the mailpiece and must not extend more than 1-3/4 inches from the right edge.

Address Format: The complete address, including the name of the permit holder (company or individual), must be printed on the mailpiece.

ZIP Code: A unique ZIP+4 code is assigned to each piece.

Before printing, submit proofs of BRM samples to your local post office for advice and approval. Take advantage of this service—it could save you money. Qualified Business Reply Mail pieces must be approved by the USPS before printing.

Barcode Location: The POSTNET or Intelligent Mail barcode may be located here or in the address block. The barcode must be a ZIP+4 barcode (delivery point barcodes are not permitted). This area must be free of any printing other than the barcode. A free camera-ready barcode positive may be obtained from your local post office.

Dimensions: Between 3-1/2 by 5 inches and 6-1/8 by 11-1/2 inches. To qualify for the card price, cards must be between 3-1/2 by 5 inches and 4-1/4 by 6 inches and between 0.007 and 0.016 inch thick. Larger card sizes are available, but they are charged at First-Class Mail letter price.

Barcoded pieces measuring more than 4-1/4 inches high or 6 inches long must be at least 0.009 inch thick.

- Additional standards apply to QBRM pieces (507.8.3).
- A surcharge is assessed for nonmachinable letters (101.1.2).

Ink/Paper Colors and Type Styles: Not all colors of paper and/or ink and type styles are compatible with automated equipment. Contact your local post office for guidance.

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation First-Class Mail, Periodicals, and Standard Mail must meet the standards in 201.3.14.

Overview Courtesy reply mail (CRM) consists of preaddressed postcards or envelopes provided by the mailer to customers both to expedite their responses and to provide more accurate delivery. It differs from business reply mail (BRM) in that no fees are required and the respondent is responsible for applying the correct postage before mailing back the card or envelope. CRM can come back faster because it is prepared with the correct address and barcode to take advantage of automated USPS processing. It is also good to use when you wish to direct replies (payments) to an address that is different from your usual mailing address. CRM templates are available on the Postal Explorer Web site at pe.usps.com by selecting "Mailpiece Design" in the left frame.

The USPS provides free of charge the facing identification mark (FIM) and the appropriate barcode to print on CRM pieces. The guidelines on page two will help optimize the use of this format.

Market research shows that providing barcoded envelopes makes good business sense:

- Barcoded reply envelopes can be processed and delivered faster by the post office.
- Customers save the time required to find an envelope, look up an address, and then write or type the address.
- Customers with correctly addressed return envelopes do not make addressing errors that can delay your returns.
- Customers and donors return payments and pledges significantly faster when supplied with a return envelope.
- Providers of return envelopes get remittance faster for optimum cash flow.
- Customers who are "thanked" by the back copy on the envelope flap are more likely to repeat the performance of mailing remittances or donations.
- Automated processing of properly prepared barcoded reply mail provides accurate sorting and eliminates mail delay.
- Customers have positive attitudes about creditors, marketers, and fund raisers who show thoughtfulness in providing reply envelopes.
- Providers of reply mail envelopes get orders faster, reducing inventories and their investment in them.
- Providers of reply envelopes receive and fulfill orders sooner, which improves customer relations.
- Providers using barcoded reply envelopes see faster initial response, giving them an earlier projection of future activity.

Barcodes (202.5.0) Barcodes may be placed either in the address block or in the lower right barcode clear zone. The correct barcode could be a delivery point barcode, a ZIP+4 barcode (if the address is assigned an individual (unique) ZIP+4 code), or, in some cases, a 5-digit barcode (if the address is assigned a firm (unique) 5-digit ZIP Code).

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation First-Class Mail, Periodicals, and Standard Mail must meet the standards in [201.3.14](#).

Courtesy Reply Mail Layout Guidelines

Facing Identification Mark (FIM): Use FIM A on all courtesy reply mail postcards and letter-size mailpieces with the appropriate POSTNET barcode. This permits computerized cancellation equipment to align, postmark, and direct the mailpiece properly.

FIM Location: The FIM clear zone must contain no printed matter other than the FIM A pattern. FIM bars must be between 1/2 and 3/4 inch high and 0.03125 (1/32 inch) (\pm 0.008 inch) wide.

Address Format: The complete address, including the name of the sender (company or individual), must be printed directly on the mailpiece.

POSTNET Barcode Location: This area must be free of any printing other than the appropriate barcode (see reverse). A camera-ready barcode positive may be obtained from your local post office.

Dimensions: Between 3-1/2 by 5 inches and 6-1/8 by 11-1/2 inches. To qualify for the card price, cards must be between 3-1/2 by 5 inches and 4-1/4 by 6 inches. Larger postcard sizes are available, but they are charged at the regular First-Class Mail letter price. Postcard thickness must be between 0.007 and 0.016 inch.

- If letter mail is more than 4-1/4 inches high or more than 6 inches long, it must be at least 0.009 inch thick.
- A surcharge is assessed for nonmachinable letter-size mailpieces (101.1.2).

Ink/Paper Colors and Type Styles: Not all colors of paper and/or ink and type styles are compatible with automated equipment. Contact your local post office for guidance.

Overview
(604.4.0) Meter stamps may be used to prepay reply postage on Express Mail; Priority Mail (when the rate is the same for all zones); all First-Class Mail cards, letters, and flats up to a maximum of 13 ounces; single-piece Media Mail and Library Mail.

The USPS provides free of charge the FIM (facing identification mark) and appropriate barcode to print on meter reply letter-size mailpieces. The guidelines on page two will help optimize the use of this format.

The following conditions apply (604.4.4.2):

- Meter stamp amount must be enough to prepay postage in full.
- Meter stamps may be printed directly on a mailpiece or address label that bears the delivery address of the meter license holder. A label must adhere so that once applied, it cannot be removed in one piece.
- Reply mail prepaid with meter stamps is delivered only to the address of the license holder.
- Any photographic, mechanical, or electronic process (other than handwriting, typewriting, or handstamping) may be used to prepare the address side of meter reply mail. The address side must follow the style and content of the example on the reverse.
- Meter stamps used to prepay reply postage must not show the date, except for IBI generated by a PC Postage system (604.4.5.1c).
- Mailers may use FIM A on barcoded letter-size First-Class Mail reply mail except when using PC Postage.
- When using PC Postage, mailers must use FIM D for prepaid reply mail when the indicium is printed directly on the mailpiece.
- Print the words "NO POSTAGE STAMP NECESSARY POSTAGE HAS BEEN PREPAID BY" directly above the address.

Barcodes
(708.4.0) Envelopes and cards formatted for meter reply mail on which the mailer failed to imprint a meter stamp are treated as basic BRM. Such mail is delivered after payment of postage and the applicable BRM per-piece charge (507.9.0).

Barcodes on letter-size pieces may be placed either in the address block or in the lower right barcode clear zone. The correct barcode could be a delivery point barcode, a ZIP+4 barcode (if the address is assigned a (unique) ZIP+4 code), or, in some cases, a 5-digit barcode (if the address is assigned a (unique) 5-digit ZIP Code).

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation First-Class Mail, Periodicals, and Standard Mail must meet the standards in 201.3.14.

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Meter Reply Mail Layout Guidelines

Facing Identification Mark (FIM): A FIM A may be used on meter reply mail postcards and letter-size mailpieces with the appropriate POSTNET barcode. A FIM D may be required with postage printed by a PC Postage System. Use of a FIM permits computerized cancellation equipment to align, postmark, and direct the mailpiece properly.

FIM Location: The FIM clear zone must contain no printed matter other than the FIM pattern. FIM bars must be between 1/2 and 3/4 inch high and 0.03125 (1/32 inch) (± 0.008 inch) wide.

Dimensions: Between 3-1/2 by 5 inches and 6-1/8 by 11-1/2 inches. To qualify for the card price, cards must be between 3-1/2 by 5 inches and 4-1/4 by 6 inches. Larger postcard sizes are mailable, but they are charged at the regular First-Class Mail letter price. Card thickness must be between 0.007 and 0.016 inch.

- If letter mail is more than 4-1/4 inches high or more than 6 inches long, it should be at least 0.009 inch thick.
- A surcharge is assessed for nonmachinable letter-size mailpieces (101.1.2). The surcharge must be included in the prepaid postage amount.

Ink/Paper Colors and Type Styles: Not all colors of paper and/or ink and type styles are compatible with automated equipment. Contact your local post office for guidance.

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation First-Class Mail, Periodicals, and Standard Mail must meet the standards in 201.3.14.

Overview (507.1.4) Ancillary service endorsements are used by mailers to request an addressee's new address and to provide the USPS with instructions on how to handle undeliverable-as-addressed pieces. The endorsements consist of one keyword: "Address," "Return," "Change," or "Forwarding," followed by the two words "Service Requested." The endorsements are the same for all classes of mail, but the treatment and cost differ by class of mail. Use of an ancillary service endorsement on a mailpiece obligates the mailer to pay any applicable charges for forwarding, return, and separate address notification charges.

General Information (102.4.2) Proper placement of the endorsement is required. If the endorsement cannot be seen or understood, you might not receive the service requested. A return address as presented in 602.1.6 must be used and placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If a return address is a multiple delivery address, it must show a unit designation (e.g., apartment number).

Physical Standards (102.4.4) An endorsement must be printed in no smaller than 8-point type, and it must stand out clearly against its background. Brilliant-colored envelopes and reverse printing are not permitted. There must be a 1/4-inch clear space around all sides of the endorsement. The endorsement and return address must read in the same direction as the delivery address.

1. Directly below the return address.
2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
3. Directly to the left of the postage area and below or to the left of any price marking.
4. Directly below the postage area and below any price marking.

For a detailed listing of the endorsements, see 507.1.5.

This guide identifies many household products by their commonly used name (e.g., perfume rather than perfumery) that help determine mailability. Use this guide to quickly determine the mailing restrictions for potentially dangerous, but common, household products.

Identifying and categorizing hazardous materials can sometimes be difficult due to the technical makeup of the items and the complexity of the regulations surrounding them.

*Domestic Mail Manual*¹ (DMM) 601.8.0—601.11.0 contains the standards that apply to the mailing of hazardous, restricted, and perishable mail.

Publication 52, Hazardous, Restricted, and Perishable Mail, provides important information to help mailers determine what may be mailed and how certain items must be packaged to keep the mail safe. It also provides guidance to USPS employees accepting this mail.

Overview The delivery address specifies where the USPS is to deliver a mailpiece. The address must be legible and complete on the side of the mailpiece that bears the postage.

General Information Placement and location: see [202.2.0](#) for letters and cards, or [302](#) for flats. The placement of the address can determine mailability of the mailpiece and/or price and eligibility. See page two for proper placement of an address block on letter-size pieces.

Complete Addresses (602.1.4) The address must include:

- Intended recipients name or other designation.
- Delivery address (including street number and name (predirectional, suffix, and postdirectional as appropriate), post office box number, rural or highway contract route and box number), and secondary descriptor and number (e.g., suite or apartment number, floor) if needed.
- City and state.
- ZIP Code or ZIP+4 code where required.

The address on automation price mail must be sufficiently complete to enable matching the current USPS ZIP+4 File when using current CASS-certified address matching software ([708.3.0](#)). Standardized address elements are not required.

Return Address (602.1.5) A return address tells the USPS where the sender wants the mail returned if it is undeliverable. A return address is required on certain types of mail. Mail qualifying for Nonprofit Standard Mail prices must have the name and return address of the authorized nonprofit organization either on the outside of the mailpiece or in a prominent location on the material being mailed (inside the mailpiece) ([703.1.5](#)).

Alternative Addressing Formats (602.3.0) Simplified addressing: simplified address format (“Postal Customer”) is used when general distribution is requested to each customer on a rural route or highway contract route at any post office or to each boxholder at a post office without city carrier service. Government agencies may also use simplified addressing for official matter being sent to all stops on city carrier routes and post office boxholders at post offices with city carrier service.

Occupant addressing: mailer may use “Occupant” (instead of a recipient’s name) with a complete delivery address on mail intended for selective distribution.

Exceptional addressing: indicates that mailpiece should be delivered to the current resident if addressee has moved. Exceptional addressing may not be used on certain types of mail.

Addressing Guidelines The following guidelines for addressing a mailpiece are in USPS [Publication 28, Postal Addressing Standards](#):

- Use simple sans serif type with uniform stroke thickness.
- Type or machine-print in dark ink on a light background with a uniform left margin.
- Left-justify every line in the address block.
- Use two-letter state abbreviations.
- Use one space between city and state, two spaces between state and ZIP+4 code.
- Use appropriate ZIP+4 code (if unknown, use 5-digit ZIP Code).

Overview (604.3.0) Use of precanceled stamps is an optional payment method for mailings at Presorted and automation First-Class Mail and all Standard Mail prices. Precanceled stamps may not be used with Package Services or Standard Mail with extra services. This payment method requires the stamps to be affixed to each piece.

Fees Mailer must complete **PS Form 3615, Mailing Permit Application and Customer Profile**, and submit it to the office of mailing. No permit application fee required.

Postage and Payment Methods Documentation: mailings of nonidentical-weight pieces and mailings that do not have full correct postage affixed to each piece must meet basic documentation standards in **708.8.0** unless excepted by standard in **604.3.1**.

Return address: complete domestic return address required. If return address is outside delivery area of post office of mailing, mailer must follow one of the options in **604.3.1**.

Amount of Postage The value of a precanceled stamp affixed to each piece in a mailing must be either the exact amount due or another amount permitted by standard. If the exact amount is not affixed to each piece, documentation meeting the basic standards in **708.8.0** and those applicable to the price claimed must be submitted with the mailing unless excepted by **234.4.0** or **244.4.0**.

Producing Precanceled Stamps Selection produced by USPS for specific users; other stamps may be precanceled by the USPS (**604.3.1**); other stamps may be precanceled by the mailer (**604.3.4**), as described below.

Precancellation by mailer:

- Application: complete **PS Form 3615** for authorization to preprint price markings or use a precancel postmark on adhesive stamps, stamped cards, and stamped envelopes (**604.3.4**).
- Authorization conditions: valid only for sample mailpieces accompanying application and approved for use. Approval is required for each additional precanceled postmark format or preprinted marking used (**604.3.4.3**).

Format of postmark and required content:

- First-Class Mail: day, month, and year of mailing. Standard Mail: month and year of mailing.
- Words "Mailer's Postmark" followed by permit number and cancellation bars to cancel postage stamps.
- Either the city, state, and 5-digit ZIP Code of the post office where the precancel permit is held and the mailing is deposited or the words "Mailed From ZIP Code" followed by the 5-digit ZIP Code of the office of mailing.

Mail Preparation Other markings and endorsements may be required on each piece under standards for the price claimed or services requested (**604.3.1**).

Enter and Deposit Deposit: generally, at post office where permit is held. Mail with precanceled postage must not be deposited in collection boxes (**604.3.1**).

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Mailer's Precanceled Postmarks

Overview (604.4.0) Postage meters and PC Postage systems generate indicia imprinted on or affixed to a mailpiece as evidence of prepayment of postage. This method of postage payment may be used on any class of mail except Periodicals. PC Postage systems access a personal computer to print postage indicia. Postage meters and PC Postage systems are available only by lease from an authorized provider. The USPS holds the provider responsible for the control, operation, maintenance, and replacement of their products. No one other than the provider may use a postage meter or PC Postage system without a valid USPS postage meter license and a rental agreement with the provider.

Authorized Providers (604.4.1.3)

The following are USPS-authorized providers:

Provider	Meter	PC Postage	Phone	Internet
■ Data-Pac Mailing Systems Corp.	X		800-355-1755	www.data-pac.com
■ Hasler Inc.	X		800-243-6275	www.haslerinc.com
■ Francotyp-Postalia Inc.	X		800-341-6052	www.fpusa.net
■ Neopost	X		800-624-7892	www.neopostinc.com
■ Pitney Bowes Inc.	X	X	800-322-8000	www.pitneybowes.com
■ Endicia.com (PSI Systems)		X	800-576-3279	www.endicia.com
■ Stamps.com		X	888-434-0055	www.stamps.com

Customer Agreement (604.4.2)

A mailer wanting to be licensed to use a postage meter or PC Postage product must enter into a signed agreement with a provider. A separate letter of application must be submitted to each post office where the mailer wants to deposit metered mail. There is no fee for this application and license.

After a postage meter or a postal security device (PSD) is delivered to a licensee, the meter or PSD must be kept in the licensee's custody until returned to the authorized provider. The licensee is prohibited from taking a meter outside the United States, its territories, or its possessions without written permission from the manager of Metering Technology Management, USPS Headquarters.

The licensee must immediately notify the provider of any change in the licensee's name, address, telephone number, or the location of meters.

The licensee must immediately report misregistering or otherwise defective meters to the provider. In addition, the licensee must immediately report to the provider the loss or theft of any meter or PSD or the recovery of any missing meter or PSD.

Postage Payment (604.4.3)

The value of metered postage applied to each piece in a mailing must be either the exact amount due or another amount permitted by standard. Refunds for overpayment are considered only under standards in 604.9.0.

Metered postage must be legible and not overlap each other if more than one impression is applied to the same piece. Metered postage must be printed or applied in the upper right corner of the envelope or address label. Indicia must be printed with USPS-approved fluorescent ink or use another USPS-approved method to ensure that the mail is faced during processing. Approved methods include the use of a facing identification mark (FIM) for indicia printed directly on letter-size First-Class Mail or printing indicia on USPS-approved label or tape. USPS-approved labels or tapes must be used when meter stamps are printed on tape (604.4.4).

Meter Date (604.4.5)

The date format used in the indicia is subject to the following conditions.

- Complete Date. Mailers must use a complete date for the following:
 1. All First-Class Mail, Priority Mail, and Express Mail pieces.
 2. All mailpieces with Insured Mail, COD, or Special Handling service.
 3. All mailpieces prepared with the indicia printed on nonadhesive paper (e.g., computer printer paper) and affixed to the mailpiece or used as part of an insert in a window envelope.
- Month and Year. Mailers may use a complete date or a mailing date consisting solely of the month and year in the indicia only for Standard Mail and Package Services pieces.
- No Date. Mailers must use indicia with no mailing date for prepaid metered reply postage. As an option, mailers may use indicia with no mailing date for Standard Mail and Package Services pieces not subject to 604.4.5.2a.

Enter and Deposit (604.4.5.3)

Generally, metered mail must be deposited at locations designated by the postmaster of the licensing post office (i.e., the post office shown in the meter stamp). Exceptions include:

- Single-piece First-Class Mail, Express Mail, and Priority Mail may be deposited in any street collection box or post office.
- Drop shipment of metered mail may be used (705.17.0).

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Overview (604.5.0) Mailers may be authorized to mail without affixing postage if payment is made at the time of mailing from permit imprint advance deposit account. This payment method may be used to pay special service fees as well as postage. Each mailpiece sent under this method must bear a permit imprint indicia showing that postage is paid. Permit imprint mailings must contain at least 200 pieces or 50 pounds (604.5.1), but higher volumes may be required for mail at some prices. These mailings must be presented for weighing unless otherwise authorized by Business Mailer Support (608.8.1).

Fees (604.5.1.4) A mailer must complete *PS Form 3615, Mailing Permit Application and Customer Profile*, and pay a \$180.00 one-time application fee at the post office where mailings are made. If no permit imprint mailings are made during a 24-month period, the permit is revoked. A separate annual mailing fee may also be due, depending on the class of mail to be prepared.

Indicia Preparation (604.5.3) Producing imprints: embossed or unembossed permit imprints may be made by printing press, hand stamp, lithography, mimeograph, address plate, or similar device. They must not be typewritten or hand-drawn. Formats: permit imprints for ordinary mail and official mail must be prepared in one of the formats described in 604.5.3. See page two for examples as applicable to the price claimed or class of mail. Company-style imprints may be used in which the exact name of the company or individual holding the permit is shown in the indicia in place of the city, state, and permit number, subject to 604.5.3.9.

Indicia Content (604.5.3.2) Permit imprints for First-Class Mail and Priority Mail must show city and state, applicable markings (“First-Class Mail,” “Priority Mail,” or “Priority”), “U.S. Postage Paid,” and permit number. The Priority Mail marking may be omitted when using USPS-provided Priority Mail envelopes and containers. The permit imprint may include the mailing date, amount of postage paid, or number of ounces for which postage was paid, ZIP Code, and price markings. The endorsement “Mailed From ZIP Code,” followed by the 5-digit ZIP Code assigned to the post office of mailing, may be used instead of printing the city and state (604.5.3.6). Standard Mail, Parcel Post, Bound Printed Matter, Media Mail, and Library Mail permit imprints must contain the same information required for First-Class Mail imprints, except that the date and words “First-Class Mail” or “Priority” or “Priority Mail” must be substituted with the applicable class or subclass name. The permit imprint may include the amount of postage paid, the weight of the piece, and price markings as required (604.5.3.2).

Mail Preparation All pieces in a permit imprint mailing must be of identical weight unless otherwise authorized by Business Mailer Support (608.8.1). Other markings and endorsements may be required by the standards for the price claimed or service requested.

Deposit Mailings must be deposited at a business mail entry unit or other location designated by the postmaster. Mail must not be deposited in street collection boxes. Postage statements must be submitted as specified by the standards for the price claimed or service requested.

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

What are the Private Express Statutes? (608.5.0)	The Private Express Statutes are a group of laws under which the U.S. Postal Service (USPS) has the exclusive right, with certain limited exceptions to carry letters for compensation. The Statutes are based on the provision in the U.S. Constitution that empowers Congress "to establish Post Offices."
What is the purpose of these Statutes?	Congress enacted the Statutes to protect the USPS and thereby enable it to fulfill its mission of providing mail service to all parts of the country at uniform rates. The Statutes enable the USPS to fulfill its responsibilities by preventing private courier services from competing selectively with the USPS on its most profitable routes.
What is a letter?	For the purpose of the Private Express Statutes, a letter is defined as a message directed to a specific person or address and recorded on a tangible object. A more complete definition can be found at title 39, Code of Federal Regulations (CFR), 310.1.
What do the Private Express Statutes require?	The Statutes provide that letters may be transported outside the U.S. Mail system only if one or more of the exceptions apply, or appropriate postage is paid. The basic prohibition is against private carriage of letters for other persons without payment of postage.
Are there any exceptions to the Private Express Statutes?	<p>The law allows for the private carriage of letters under certain circumstances, including:</p> <ul style="list-style-type: none">■ Letters for which sender has paid at least 6 times the price currently charged for the first ounce of a single-piece First-Class Mail letter.■ Letters weighing at least 12 ½ ounces.■ Letters sent with and relating in all substantial respects to the cargo that they accompany.■ Letters carried by the sender, recipient, or the regular, salaried employees (not independent contractors) of either party.■ Letters carried without any financial or other valuable compensation.■ 25 or fewer letters carried by special messenger on an infrequent, irregular basis for the sender or addressee.■ Letters carried prior or subsequent to mailing.■ Properly marked letters whose value or usefulness would be lost or greatly diminished if Letters not delivered within certain time standards listed in postal regulations ("extremely urgent" letters).■ Letters addressed to campus destinations that colleges and universities carry in their internal mail systems for their bona fide student or faculty organizations.■ Letters carried from a point in the United States to a foreign country for deposit in the foreign country's domestic or international mails for delivery to an ultimate destination outside the United States.■ Data processing materials sent between an office and a data processing center, within certain delivery time standards listed in postal regulations.■ Certain international ocean carrier-related documents accompanying cargo.■ Advertisements enclosed with merchandise in parcels or accompanying periodicals under certain conditions. <p>More information regarding exceptions and suspensions to the Private Express Statutes is available in 39 C.F.R. §§ 310.3 and 320.</p>

**Frequently
Asked
Questions****Q. What is Nonprofit Standard Mail?**

A. Nonprofit Standard Mail is printed matter such as pamphlets, newsletters, direct mail, or merchandise that weighs less than 16 ounces and is eligible for nonprofit prices mailed by an authorized nonprofit organization.

Q. What can an authorized organization mail at nonprofit prices?

A. An authorized organization can mail only its own mail.

■ A product may be mailed at Nonprofit Standard Mail prices only if it meets one of the following requirements:

- The product must be a low-cost item. “Cost” is based on the price paid by the nonprofit organization to acquire the product, and not the sale price. (At the beginning of each calendar year, the value of low cost is adjusted for the cost of living (see 703.1.6.11 for current cost)).
- It must be a gift or donation obtained by your organization at no cost or,
- It must be a periodical publication of a nonprofit organization. (If any eligible product contains advertising, it is also subject to the information provided below.)

Q. What types of advertising are not eligible?

A. The following types of advertising are not eligible:

- Any advertisements that promote credit, debit, or charge cards are always prohibited at Nonprofit Standard Mail prices.
- Advertising that promotes or offers any insurance policy is ineligible for Nonprofit Standard Mail prices, unless it is promoted to members, donors, supporters, or beneficiaries of the authorized mailer and provided the policy coverage is not generally, otherwise, commercially available.
- Advertising or announcements that promote the availability of any travel arrangement are ineligible unless the arrangement is promoted to members, donors, and supporters of the organization, and the reason for the travel must contribute substantially to the organization’s qualifying purpose.

Q. How can I make sure my newsletter meets the content requirements of a Periodicals publication?

A. To meet those requirements, a newsletter must:

- Have a title printed on the front cover.
- Consist of printed sheets and not be reproduced by stencil, mimeograph, or hectograph processes.
- Contain an identification statement within the first five pages. This statement must include the title; issue dates; publication frequency; name and address of the organization; issue number; International Standard Serial Number, if applicable, and the subscription price, if applicable.
- Have contents that are at least 25% nonadvertising.

Q. I want to hire a mailing house to print and mail my organization’s newsletter. We are authorized to use Nonprofit Standard Mail prices, but the mailing house isn’t. Is the mailing eligible for Nonprofit Standard Mail prices?

A. As an organization authorized to mail at Nonprofit Standard Mail prices, you can use a commercial firm to prepare and present your mailing for you at those prices. The issue is whether the arrangement is a legitimate “principal–agent” relationship. If you are paying a fee to the mailing house to prepare your mailing, and the mailing house has no other interest in the mailing, it should be eligible for Nonprofit Standard Mail prices. However, if the mailing house shares in the advertising revenues, places its own advertisement(s) in the mailpiece at no cost, or at a discount, or will not receive any fees for its services (reimbursement for expenses), the mailpiece would probably not be eligible for Nonprofit Standard Mail prices. Under this arrangement, the mailing house now has a vested interest in the mailing and is no longer functioning in an agent capacity.

For the specific DMM standards applicable to this category of mail, consult the DMM sections referenced above and the general sections within each DMM module.

Determining Length and Height (705.1.1.3)

■ Maximum height, stacked pallets: 84 inches (pallets + pallet boxes + top caps).
The contents may not stick up over the rim of the pallet box.

Individual pallets must be strapped or stretchwrapped (or both); the entire pallet stack must be securely banded (not stretchwrapped). Quick Service Guide

General (705.8.10)

Trays are stacked on pallets so that many trays can be moved as a single unit. Trays must be individually sleeved, strapped, and labeled. See 705.8.3.5 for exception to the strapping requirement. Any combination of trays (1-foot, 2-foot, EMM) can be stacked on the same pallet, as long as the finished pallet is sturdy and meets all height and weight requirements. Trays may not be combined with other containers (parcels, sacks) on the same pallet.

Dimensions (705.8.5)

Height:

- Minimum volume: 36 linear feet of letter trays or 3 full levels of trays. See 705.8.0 for exception to the minimum height.
- Maximum height, single pallet: 77 inches (pallet + mail + top cap) or 12 layers of MM trays (11 layers of EMM trays).
- Maximum height, stacked pallets: 84 inches (pallets + mail + top caps).

Weight:

- Minimum weight: none. Based on number of tray levels.
- Maximum weight: 2,200 pounds.

Labels (705.8.6)

Pallets are labeled according to content and destination of the mail. See individual QSGs. At least two clearly visible labels must be affixed to two adjacent sides of each pallet. Use pink labels for Periodicals and white labels for Standard Mail and Package Services. Labels must be at least 8 inches x 11 inches; lettering for required information must be at least 1/2 inch high.

Top Caps (705.8.2)

Top caps are not required except when pallets are stacked. If used, top caps must be stretchwrapped or banded onto the trays and pallet.

Stretchwrap (705.8.14.5)

Stretchwrap must be used to secure the trays to the pallet and must be securely wrapped around the pallet. Banding alone is not permitted.

Tips on Stacking Trays

Trays should be counter-stacked where possible to build the sturdiest pallet possible. It is easy to build a very sturdy locking pallet of all 2-foot trays (see diagram below for recommended method). All trays on a pallet should be stacked right-side-up with labels facing outward (where possible).

Stacking Pallets of Trays

Pallets of trays may be stacked to a maximum of four high or 84 inches. Individual pallets must be stretchwrapped; the entire pallet stack must be securely banded (not stretchwrapped). There must be enough space between pallets to allow for a forklift.

Price Eligibility Overview	Bundles of Standard Mail must be sorted and prepared under the standards for the price claimed. Prices are bundle-based. Prices are based on the preparation of mail in bundles and are not affected by the pallet on which a bundle is placed.
General Bundle Preparation Standards	Bundle preparation must meet the applicable general standards in 345.5.0 (Presorted Standard Mail), 345.6.0 (Enhanced Carrier Route Standard Mail), or 345.7.0 (Automation Flat Mail). Mixed ADC bundles may not be placed on pallets.

Bundles are not subject to a specific thickness limit. When there are fewer than 10 pounds for a destination, the pieces must be prepared in a single physical bundle. When there are 10 or more pounds for a destination, pieces should be prepared in bundles weighing from 10 to 20 pounds each except that the last bundle may weigh less than 10 pounds and mailers may balance the mail in bundles as follows:</p> <ul style="list-style-type: none">■ The total number of physical bundles prepared for a presort destination must not exceed the number of 10-pound increments to that destination. Securing Individual Bundles (705.8.5.11)	<p>Bundles on pallets must be secure and stable and able to withstand normal transit and handling without breakage or injury to USPS employees. To prevent broken bundles, material used to secure bundles should be of adequate strength, be sealed securely (e.g., by heat or adhesive), and fit tightly around the bundles. 4. Processing and Distribution managers may authorize pallets of less than 250 pounds for their service area for mailings entered within their service area only. For these destinations, one residual (overflow) pallet of less than 250 pounds may be prepared for the service area of the entry office without special approval.
5. After preparing all required pallets (and any optional pallets), when 250 or more pounds of bundles remain for a BMC/ASF, the BMC/ASF pallet must be prepared. If there are no BMC/ASF pallets in the mailing and 250 or more pounds of bundles remain for an SCF, the SCF pallet must be prepared.

Eligibility Overview	Bundles of flats or nonmachinable parcels must be sorted and prepared under the standards for the price claimed. See Quick Service Guide 360 for Bound Printed Matter Flats or Quick Service Guide 460 for Bound Printed Matter Nonmachinable and Machinable Parcels. Destination entry under 366 for flats or 466 for parcels is optional. Individual pieces weighing 10 pounds or more are not eligible for preparation on pallets unless prepared as machinable parcels or prepared in sacks under 465.5.0 for presorted or 465.6.0 for carrier route parcels.
General Bundle	Bundle preparation must meet the applicable general standards in 365 for flats and 465 for parcels. Mixed ADC bundles must not be placed on pallets.
Bundle Size	<p>Prepare Carrier Route Bound Printed Matter (BPM) bundles and label under 365.6.0 for flats and 465.6.0 for parcels. Prepare and label Presorted BPM bundles in the sequence and to the destinations required for sacks in 365.5.0 for flats and 465.5.0 for parcels. Prepare a bundle when there are 10 or more pieces or 10 or more pounds, whichever comes first, for the same presort destination within an individual mailing (Carrier Route or Presorted). Bundles are not subject to a specific thickness limit. It is, however, recommended that bundles not exceed 8 inches in height.</p> <p>Each physical bundle must contain at least 2 addressed pieces. The maximum bundle size is 20 pounds, except as provided in 705.8.9.5. When there are at least 10 pieces but fewer than 10 pounds for a presort destination, the pieces must be prepared in a single physical bundle. When there are 10 or more pounds for a destination, pieces must be prepared in bundles weighing from 10 to 20 pounds each except that the last bundle may weigh less than 10 pounds or contain fewer than 10 pieces (but never fewer than 2 pieces) and mailers should balance the mail in bundles as follows:</p> <p>The total number of physical bundles prepared for a presort destination must not exceed the number of 10-pound increments to that destination. For example, if there are 95 pounds of mail to a 3-digit ZIP Code presort destination, bundles could be prepared as four 20-pound bundles and one 5-pound bundle, or nine 10-pound bundles and one 5-pound bundle.</p>
Securing Individual Bundles	<p>Bundles on pallets must be secure and stable and able to withstand normal transit and handling without breakage or injury to USPS employees. To prevent broken bundles, material used to secure bundles should be of adequate strength, be sealed securely (e.g., by heat or adhesive), and fit tightly around the bundles. Prepare bundles as follows:</p> <ul style="list-style-type: none">■ Select one of the methods below for securing individual bundles placed on 5-digit, 3-digit, SCF, and ASF pallets:<ul style="list-style-type: none">■ Heavy-gauge shrinkwrap plus one or two bands.■ Only heavy-gauge shrinkwrap.■ Two bands, one around the length and one around the width. Use sufficient tension. Wire and metal strapping are prohibited.
Pallet Preparation and Documentation	<p>Pallet sortation: see pages 2 and 3.</p> <p>Documentation:</p> <ul style="list-style-type: none">■ Postage statement: PS Form 3605-R or approved facsimile.■ Supporting documentation: Documentation required unless correct rate is affixed to each piece (see 364, 464).

**Physical
Standards
(453.1.0)**

Standard Mail, Parcel Select, Bound Printed Matter, and Periodicals may be eligible for further discounts if the mail is entered closer to its destination.

After mail is verified and postage is paid at the facility where the mailer holds the permit, the mail can be taken to three places to receive a destination entry discount: a destination bulk mail center (DBMC) (or destination area distribution center (DADC) for Periodicals), a destination sectional center facility (DSCF), or a destination delivery unit (DDU). The discount received depends on where the mail is entered.

Prices and Fees

Discount varies by destination and class of mail, subject to payment of applicable mailing fees. All mail must meet the eligibility, volume, and preparation standards for the class of mail and price claimed.

Standard Mail (see [246](#) for letters, [346](#) for flats, or [446](#) for parcels):

Minimum volume: 200 or more addressed pieces (or 50 pounds) per mailing. Regular and Nonprofit Standard Mail meeting the basic standards in [243.2.0](#), [343.2.0](#), or [443.2.0](#) may qualify for DBMC, DSCF, or DDU discounts.

- DBMC price applies to mail deposited at the correct DBMC (or destination auxiliary service facility (ASF)) addressed for delivery within that facility's service area and prepared subject to the standards for the price claimed.
- DSCF price applies to mail deposited at the correct DSCF ([L002](#), Column C, and [L006](#), Column C). The mail must be addressed for delivery within that facility's service area and placed in a tray, sack, or pallet (as permitted by the price claimed) that is correctly labeled to that DSCF or postal facility within its service area. The DSCF price also applies to mail deposited at a DDU under [246.4.0](#) for letters, [346.4.0](#) for flats, or [446.4.0](#) for parcels.
- DDU price applies to carrier route mail that is entered at the facility (post office, station, branch, etc.) where the carrier cases mail for the carrier route (city route, rural route, highway contract route, general delivery unit, or post office box section) serving the address on the mailpiece. Pieces for which a DDU discount is claimed must also be eligible for and claimed at one of the Enhanced Carrier Route prices or Nonprofit Enhanced Carrier Route prices.

Parcel Select Destination Entry ([456.2.0](#)):

- DBMC: entered at the destination BMC/ASF for delivery within the DBMC/ASF service area and part of a mailing of 50 or more Parcel Select pieces.
- DSCF: entered at the designated facility for delivery within the DSCF area, sorted by 5-digit scheme or 5-digit ZIP Code destinations, and part of a mailing of 50 or more Parcel Select pieces. Nonmachinable parcels sorted to 3-digit ZIP Code areas subject to \$0.91 surcharge ([456.2.2.3](#))
- DDU: entered at the designated destination delivery unit for delivery within the DDU area and part of a mailing of 50 or more Parcel Select pieces.

Bound Printed Matter ([363](#) for flats or [463](#) for parcels):

- DBMC price applies to mail deposited at the correct DBMC (or destination auxiliary service facility (ASF)) addressed for delivery within that facility's service area and prepared subject to the standards for the price claimed.
- DSCF price applies to mail deposited at the correct DSCF. The mail must be addressed for delivery within that facility's service area.
- DDU price applies to mail entered at the designated destination delivery unit for delivery within the DDU area. Price not available for flat-size pieces weighing 1 pound or less unless sorted to carrier route.

Periodicals ([707.29.0](#)):

- DBMC price applies to mail entered at the DBMCs or DASFs listed in Exhibit 346.3.1, or at a USPS-designated facility. For DBMC entry, pieces must be prepared in bundles or in sacks on SCF, ADC, 3-digit, or 5-digit pallets, and addressed for delivery to one of the 3-digit ZIP Codes served by that BMC.
- DADC price applies to addressed pieces (not eligible for In-County prices) addressed for delivery in the same DADC service area, deposited at the DADC or designated facility.
- DSCF price applies to:
 - Letter-size and nonletter-size pieces (not eligible for In-County prices), when deposited at an SCF or a designated facility ([L005](#)) and addressed for delivery within the service area of the facility, including when part of a 3-digit scheme combination in [L008](#).
 - Nonletter-size piece only, when deposited at a DDU ([707.28.4.1](#)) and prepared as follows:
 1. In 5-digit bundles placed in a merged 5-digit scheme or merged 5-digit sack.
 2. In 5-digit bundles placed on a merged 5-digit scheme, merged 5-digit, or 5-digit scheme pallet.
- DDU price applies only to copies of publications entered at the facility where the carrier cases mail for the carrier route (city carrier route, rural route, highway contract route, general delivery unit, or post office box section) serving the address on the mailpiece. Pieces for which a DDU discount is claimed must also be eligible for and claimed at a Carrier Route price.

**Eligibility
Standards
(707.11.3)**

In-County prices apply to subscriber or requester copies of any issue of a Periodicals publication when the copies are entered within the county in which the post office of original entry is located for delivery to addresses within that county and outside county copies that are part of a carrier route with addresses destined inside the county, under either of these two conditions:

- The total paid or requested circulation of the issue is less than 10,000 copies.
- The number of paid or requested copies of the issue distributed within the county of publication is more than 50 percent of the total paid or requested circulation.

The simplified and exceptional address formats are prohibited on Periodicals publications intended to count as subscriber or requester copies to meet the applicable circulation standards (602.3.1.2).

**Preferred Prices
(707.11.3)**

Preferred prices include:

- In-County
- Nonprofit
- Classroom
- Science-of-Agriculture

**Nonsubscriber
and
Nonrequester
Copies
(707.11.3)**

For a calendar year, the total number of nonsubscriber or nonrequester copies mailed at In-County prices may not exceed 10 percent of the number of subscriber or requester copies mailed at In-County prices.

For publications authorized for Preferred prices and for publications authorized for both Regular and In-County prices and/or Science-of-Agriculture prices, once the total number of nonsubscriber or nonrequester copies mailed for the calendar year (regardless of price) exceeds 10 percent of the total number of copies mailed to subscribers or requesters during the calendar year, further mailings of nonsubscriber or nonrequester copies are not eligible for any preferred price, including In-County prices.

A mailing is not eligible for any Preferred Periodicals price if it consists entirely of nonsubscribers or nonrequesters over the 10 percent limit of the total number of copies mailed to subscribers or requesters during the calendar year.

Spreadsheet

To help publishers maintain compliance with the Periodicals nonsubscriber and nonrequester copies 10 percent requirement, the reverse side of this page contains a manual spreadsheet that can be used to track a publication's mailing of subscriber/requester and nonsubscriber/nonrequester copies. An electronic version of the spreadsheet is available through Postal Explorer at pe.usps.com. To access this tool, click on "Postal Links" in the upper left frame of the Postal Explorer Home Page and then select "Nonsubscriber Percentage Calculator." The template is available as a Microsoft Excel spreadsheet.

Type and style:
■ Must be in capital letters, Arabic numerals, or asterisks with letter size and line spacing no less than the size and line spacing of the largest letter or character in the address block or any part of the address label.
■ Type font must be the same as the font used for the address block.
ZIP Code: Except for carrier route bundles, the OEL must include the appropriate ZIP Code information (see 708.7.2.5).

Address Change Service (507.4.2.4) Mailers receiving address corrections through Address Change Service (ACS) may use the first eight positions on the left side of the OEL for the ACS participant code. ACS codes must be printed in a non-narrow variant of Helvetica or Arial sans serif fonts in a range of 10 to 12 points (see [Publication 8A, Address Change Service - Traditional](#), or Publication 8B, Address Change Service One Code ACS for details).

Carrier Route Information (708.8.0) Bundles made up to individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units may be prepared without a facing slip if the standards in 708.8.1 are met. These standards apply to automation carrier route First-Class Mail, carrier route Periodicals, Enhanced Carrier Route Standard Mail, and carrier route Bound Printed Matter mailings. A minimum of 10 spaces must be allowed for carrier route information when included with other information on the OEL. Carrier route information must be preceded by at least two asterisks (**). The carrier route information is in addition to the marking standards for the class of mail and price claimed.

Carrier Route	C
